7. MARKET RISK

Qualitative Disclosure	a)	i) Views of BOD on trading/ investment activities	Market risk may be defined as the possibility of losses of assets arising out from the volatility in the market variables i.e. rate of interest, prices of securities and foreign exchange rate.
		ii) Methods used to measure market risk	The Bank applies maturity method in measuring interest rate risk for securities in trading book. As per Bangladesh Bank suggestion the capital charge for market risk exposure is computed under standardized approach using the maturity method.
		iii) Market risk management system	Treasury Division manages the market risk and ALCO regularly monitors the activities of Treasury Division in managing such risk. The Bank has adopted the limit by central bank to monitor foreign exchange open positions. Foreign exchange risk is computed on the sum of net short positions or net long positions, whichever is higher of the foreign currency positions held by the Bank.
		iv) Policies and processes for mitigating market	The Bank has formed Asset Liability Management Committee (ALCO) who monitors the activities of Treasury Division to minimize the market risk.
		risk	i) Foreign Exchange risk is the risk that Bank may suffer losses as a result of adverse exchange rate movement during a period. To evaluate the extent of foreign exchange risk, a liquidity Gap report is prepared for each currency.
			ii) Equity risk is defined as losses due to changes in market price of the equity held. To manage equity risk, the Investment Committee of the Bank ensures taking prudent investment decisions as per investment policy of the bank and capital market exposure limit set by Central Bank.

8. OPERATIONAL RISK

Qualitative	a)	Views of BOD on system	Operational risk is the risk of losses arising from human
Disclosure		to reduce Operational Risk	error, inadequate or failure of internal process and technical system, fraud or any other adverse external event. The Bank seeks to minimize exposure to operational risks subject to cost benefit trade offs. The Bank captures some pre identified risk events associated with all functional departments of the bank through standard reporting format.
		Performance gap of executives and staff	NBL recognize the importance of having right person at right place to achieve the organizational goals. The performance management process aims to clarify what is expected from employees as well as how it is to be achieved.
			The Bank puts special focus on learning and continuous development of individual's skill level by removing the weakness to perform the assigned job efficiently. The Bank arranges wide range of internal & external training programs to enhance capabilities as well as minimize performance gap that will contribute more to the organization.
		Potential external events Policies and processes	There are certain risk factors which are external in nature and can affect the business of the Bank such as Macro –economic conditions, regulatory changes, change in demand, whereas few factors affect operations of the business directly or indirectly such as political instability, Operational risk is the risk of losses arising from human
		for mitigating operational risk	error, inadequate or failure of internal process and technical system, fraud or any other adverse external event.
			The Bank has adopted policies which deal with managing different operational risks. Risk Management Division (RMD) of the Bank is primarily responsible to drive and look after the overall risk management function including operational risk management. The Internal Control and Compliance Division of the Bank, the inspection teams of Bangladesh bank and External Auditors conduct inspection on different branches and divisions at Head Office of the Bank and submit reports presenting the findings of the inspections. Necessary control measures and corrective actions have been taken on the suggestions or observations made in these reports.
		Approach for calculating capital charge for operational risk	The Bank has adopted "Basic Indicator Approach" for calculating capital charge for operational risk as per Bangladesh Bank Guidelines. Under this approach, banks have to calculate average annual gross income (GI) of last three years and multiply the result by 15% to determine required capital charge. Gross income is defined as "Net Interest Income" plus "Net Non Interest Income" of a year.

10. Leverage Ratio:

Qualitative Disclosure	a)	Views of BOD on system to reduce excessive leverage, Policies and processes for managing excessive on and off-balance sheet leverage	Leverage ratio is the ratio of tier 1 capital to total on and off-balance sheet exposures. In order to avoid building-up excessive on and off-balance sheet leverage in the banking system, a simple, transparent, non-risk based leverage ratio has been introduced. The leverage ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The leverage ratio is intended to achieve the following objectives: i) Constrain the build-up of leverage in the banking sector which can damage the broader financial system and the economy;
			5
		Approach for calculating exposure	A minimum tier -1 leverage ratio of 3% has been prescribed by Bangladesh Bank to maintain by the Banks both at solo and consolidated level.NBL maintains leverage ration quarterly basis

11. Remuneration:

Qualitative Disclosure	a)	Information relating to the bodies that oversee remuneration	 The Human Resources Division of the Bank oversees the remuneration in line with its HR policy under direct guidance of the Board of Directors of the Bank. A committee comprising of few members of Senior Management led by the Managing Director is responsible for formulating remuneration policy. The Head of Human Resources Division acts as the Member Secretary of the committee. The remuneration committee is the main body for overseeing the Bank's remuneration. The committee reviews the position of remuneration and recommend to the Board of Directors for approval considering the present cost of living, rate of inflation and existing remuneration of peer banks. The Bank does not have any external consultant in preparing and implementing the remuneration policy. The Bank follows a non discriminatory policy in respect of remuneration and benefits for Head quarter and regions. However, a foreign posting allowance in remuneration is in practice for employees
	b)	Information relating to the design and structure of remuneration processes	 who are posted outside Bangladesh. The objective of the remuneration policy is to attract and retain productive employees who can contribute substantially to the overall growth of the Bank. The remuneration policy is carefully designed and regularly updated to provide adequate incentives so that the employees are fully committed to do their best to achieve the operational goals of the Bank. The committee reviewed the Bank's remuneration policy in the year 2016. The Board approved upward revision of salary structure of the employees of the Bank as an incentive for posting better result. Changes were also made in annual increment structure in pay scales, certain allowances etc. to bring about more uniformity in the remuneration package. The risk and compliance related employees are carrying out the activities independently in line with delegation of powers and job descriptions approved by appropriate authorities.

	c)	Description of the ways in which current and future risks are taken into account in the remuneration processes:	When implementing remuneration measures, the Bank considers business risk, financial and liquidity risk, compliance and reputation risk for each official.
			Various types of measures are taken into account in determining these risks. The measures focus on the organizational goals set for operational areas. Asset quality (NPL ratio), cost-income ratio, net profit growth etc. are used for measuring the risks.
			The performance of each employees is evaluated for a particular period especially annually against performance indicators set and agreed with the officials at the beginning of the year.
	d)	Description of the ways in which the bank seeks to link performance during a performance measurement period with levels of remuneration.	The Bank has one set of Performance Appraisal Form to evaluate the performance of all categories of officials of the bank.
			Decision about promotion, granting of annual increment and incentive bonus are linked to the performance of the employees against set key performance indicators.
	e)	Description of the ways in which the bank seek to adjust remuneration to take account of longer –term performance	The Bank does not seek to adjust remuneration to take account of longer – term performance
1	f)	Description of the different forms of variable remuneration that the bank utilizes and the rationale for using these different forms:	The Bank pays variable remuneration such as, hardship allowance for Card Division and charge allowance for Divisional Head and Head of Branches. Those allowances are paid taking into account the special and technical nature of the job they perform.
